

DEPARTMENT OF HOMELAND SECURITY FEDERAL EMERGENCY MANAGEMENT AGENCY (FEMA)

The Federal Emergency Management Agency (FEMA), an agency within the Department of Homeland Security (DHS), has recently reorganized and must reestablish and enhance its Information Technology (IT) security program. In accordance with the FISMA mandate that DHS establish, develop and maintain an IT security program, FEMA has engaged *Intekras* to provide critical support to the Chief Information Security Officer (CISO).

In early October 2008, *Intekras* initiated its vital support of the establishment, implementation and maintenance of a compliance-driven IT security program. Today, *Intekras* provides personnel and other services necessary to provide technical support that guarantees information assurance for FEMA's networks, systems, databases and applications. This requires detailed knowledge and expertise in all aspects of an IT security program.

Intekras currently provides critical support in the following areas:

- Certification & Accreditation (C&A)
- Contingency Planning Services
- Encryption & PKI
- Risk Management Services
- Security Policy Development
- Security Product Evaluation
- Independent Verification & Validation (IV&V)
- Security Architecture Services
- Vulnerability Assessments
- Penetration Testing
- Security Training Services

“Intekras is proud to serve our country by assuming a vital information security support role within an agency tasked with providing critical national security responsibilities.”

Our approach in serving this very important client is to leverage our extensive information security experience and knowledge in such a way that we become a virtual extension of their information security staff. *Intekras* is proud to serve our country by assuming a vital information security support role within an agency tasked with providing critical national security responsibilities.
