

TECHNICAL SERVICES DIVISION

Department of Defense (DoD) agencies face enormous challenges in defending the United States and its interests around the world. Today's challenges have become even more complex with constant homeland security threats, a greater demand for more sophisticated technology for military operations and more innovative ways to train our military personnel in the use of this technology to defend our country. *Intekras* is proud to support both DoD and civilian agencies and their suppliers in meeting these challenges by providing innovative and cost effective solutions with a history of strong past performance in the following areas:

- Systems Engineering
- Software Development
- Business Systems Optimization
- Program & Procurement System Support
- Network Engineering Support
- Computer Systems Engineering
- Contract Management Support
- Document Management
- Program/Project Management

*“Intekras combines extensive management experience with a proven track record of providing innovative engineering and technical services to some of the largest DoD & civilian government contractors.”*

Due to very limited availability, the demands placed on agencies and contractors to identify qualified small businesses that can provide high-end technology solutions and expertise are great. *Intekras* combines extensive management experience with a proven track record of providing innovative engineering and technical services to some of the largest DoD & civilian government contractors. Our infrastructure and facilities are also fully equipped to operate programs requiring various levels of security clearance.

*Intekras* – small business providing large solutions in defense of our nation.
